SECURITY OPERATIONS CENTER

A security operations centre (SOC) is a facility that houses an information security team responsible for monitoring and analysing an organization's security posture on an on-going basis. The SOC team's goal is to detect, analyse, and respond to cyber security incidents using a combination of technology solutions and a strong set of processes. Security operations centres are typically staffed with security analysts and engineers as well as managers who oversee security operations. SOC staff work close with organizational incident response teams to ensure security issues are addressed quickly upon discovery.
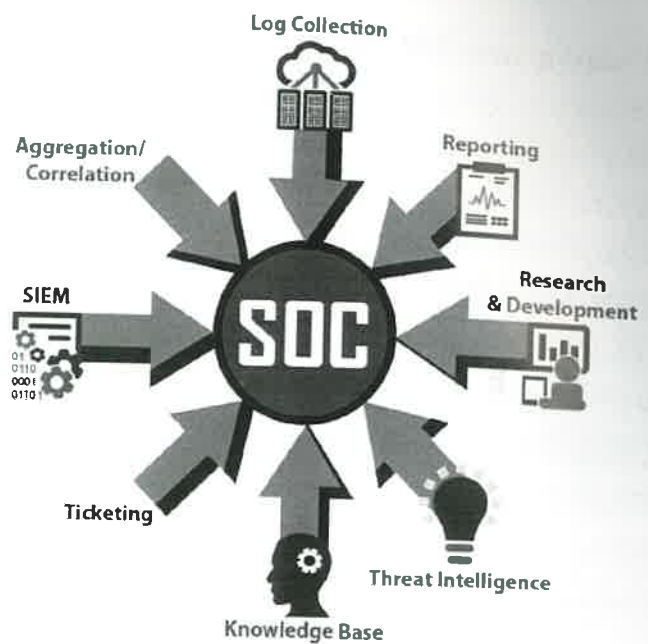

Security operations centres monitor and analyse activity on networks, servers, endpoints, databases, applications, websites, and other systems, looking for anomalous activity that could be indicative of a security incident or compromise. The SOC is responsible for ensuring that potential security incidents are correctly identified, analysed, defended, investigated, and reported.

BENEFITS OF HAVING A SECURITY OPERATIONS CENTER

The key benefit of having a security operations centre is the improvement of security incident detection through continuous monitoring and analysis of data activity. By analysing this activity across an organization's networks, endpoints, servers, and databases around the clock, SOC teams are critical to ensure timely detection and response of security incidents. The 24/7 monitoring provided by a SOC gives organizations an advantage to defend against incidents and intrusions, regardless of source, time of day, or attack type. The gap between attackers' time to compromise and enterprises' time to detection is well documented in Verizon's annual Data Breach Investigations report, and having a security operations centre helps organizations close that gap and stay on top of the threats facing their environments.

NEW CITY, NEW LIFE

It was a new life for me, as I was shifting to Bengaluru. It was all new for me. I was a loser back then in my hometown. Things didn't work well and my expectations were never met. I then decided not to hope for anything anymore.

After being shifted to Bengaluru, I was confused about choosing to join a college. But then I joined VET finally and somehow surviving, made a fun loving friend. I didn't concentrate on my studies. It was 1st semester exam results and I thought I would fail because nothing went on well in my early past life. I understood my friends wanted me to fail and my surrounding people also did not have hope of me passing exams successfully. But to my surprise, I passed all subjects.

Thereafter in all my semester exams I scored about 70% & above. I made new friends who were supportive, caring and helped me succeed in life. I participated in college events. The new college- VET and New VET classmates- my intimate friends –changed my soulless life into new and vibrant life.

I was not a loser anymore; I got a new life in new city

Poem
It was a new city new life
I was standing on a thin slab of life as I was confused
My new college and new friends
But I was still a loser as I was before
New city new life

I thought there was no hope in life
In saw a little light coming from corner
It was my semester results and I passed
My so called friends as enemies were sad because I passed
new city new life

I was happy as I was on top of the hill
Success was in my way, I participated in activities with no fear
I was happy with my new friends' new college
I am confident, I have hope, I love my

MOTHER

I love my mother; she is the most lovable person, god's gift and most precious person than anyone else in the world. My mother always encourages me, plays the most important role, not replaceable, gives comfort and she identifies every child's happiness & sorrow. Every person's success cannot be fulfilled without his/her mother. Mother is the first teacher for her child and her love for the child is not comparable. Mothers love cannot be expressed with mere words; she is the only one who understands our feelings & our necessities. Mother is sweet, caring, loving and her love is eternal & immortal. She is every Childs first friend, guide, and inspiration, encouragement supportive and caring. In will share everything with my mom, my mother will scold me to correct me and for my future.

DEPRESSION TO LIFE

In today's updated and advanced generation there are many issues going on. One of these issues is depression. What is depression according to you and me?

Depression is kind of sickness where people are mentally depressed and lost in an ocean of world. Any kind of people in any point of age can go to depression. In today's world maximum numbers of our age go to depression. There are many reasons like failure in achieving goals, family issues, and degradation from other people, love, and failure and so on. It is all because today's youth are active and reactive too. They react very soon to the situations and lose patience. They take the failure to personally and start de motivating themselves and stop trying or working hard. Due to depression they go into such a path where they start toxicating themselves by alcohols, drugs and finally end up their precious lives. Today's youngsters mainly consume drugs rather than any toxic medicines.

While every problem in this world has a solution and depression is not a big deal that we cannot overcome. There are many ways to come out of depression like consulting a psychiatrist, go on a holiday trip and so on. But all these ways are only possible when you make up your mind to come out of depression. Life is too short and goals and dreams are too huge to achieve. It is completely left to us that what we choose in life….! Is it a lifelong depression and do nothing in life or overcome the depression and achieve all the goals and dreams of life. Today it might be very tough but in future days we will be the happiest and successful person in life.

DEGREE LIFE ATTRACTIONS

In life we get attracted to many things to some people or for some habits especially from age of 16 to 21. Even I was attracted and attached to some fiends where I used to bunk classes daily in 1st year and I was getting just pass marks in all subjects. Later one day I realized that enjoying with friends, bunking and roaming it's all just part of life but not a life. That day I decide to change myself. I left all the friendship and from 2nd year I became regular student. I was attending all classes and got distinction in 2nd year and from 2nd year I am getting distinction in all academic semesters. So friends, before getting attracted or attached to something think about your life first. Attractions are common in life. But never forget your own image be yourself.

Being a NERD!

A girl, she is nice and intelligent as well. Every year she use to get distinction and she likes to learn new skills, she helps her friends to get good results in studies

But her friends and classmates were always teasing her by calling NERD and making fun of her, she feels embarrassed every day. No one was ready to take her opinion in discussions among friends because she was not aware of anything other then studies. No one understood her pure heart.

Her family would not support her to mingle with society but pressurizing her to get full marks and ordering her STUDY STUDY STUDY.... Always

Neither her family nor her friends encouraged her to learn something other than studies. All her friends enjoyed their student life and neglect her presence

I suggest:

Give a chance to all your friends to enjoy with you encourage them in their development

I want to be a soldier- Pulwama

The attack from the Pakistan soldiers to India made a tremendous difference in the life of people in Kashmir. The soldiers who were guarding the borders have to face lots of problems in their life. The bomb attack took place in Srinagar-Jammu in which more than 40 soldiers had sacrificed their lives for the sake of motherland.

The bomb attack was by cars which were travelling across the borders in India. The car was filled with harmful equipments of Pakistan soldiers. The car was stuck in the convoy. There were about 70 vehicles carrying about 2500 explosives.

The car overtook the convoy and dashed the bus which carried 44 personnel on board. So, there was a bomb explosion in India. Several soldiers were injured in the bomb attack and most of them died. The army official said that the rate of deaths of the soldiers might increase as they are injured very badly.

Our Prime Minister Dr.Narendra Modi wondered about the relationship between Pakistan and India. This attack on Indian soldiers brought sorrow to all the people of India. Everyone should become strong enough to sacrifice their life for saving our motherland. We should respect oue soldiers for their sacrifice for our motherland. Some people got scared after knowing about the attack and felt risky to join army. But people have join army to protect our country. I wish to join army like so many join the sacred field of honor.

NSS was started in our college in the year 2013 and every year our college is conducting NSS special camp in different places. This year's NSS special camp was scheduled from 11th March 2018 to 17th March 2018 held at NSS Bhavan in Bangalore University Campus.

I am very proud to say that I am one of the candidates in NSS special camp. I attended 2 NSS special camps that is one in Kadujakkasandra and other one in NSS Bhavan.

NSS camp was one of the memorable and enjoyable moments in my college life. NSS special camp helps in building communication skills and unites us together like a family and it also builds self-confidence in every NSS cadet. NSS camp is the best way to improve our leadership qualities. We have learnt self-discipline and time-management moreover we mainly get to know the value of food.

NSS special camp conducts various events like early morning prayers, exercises, shramadhana & social welfare seminars & cultural events etc. these activities help to prove our talents. NSS special camp is the best way to serve for the society and creates awareness among the youth to safeguard the nature. I heartily thank VET FGC for providing such a big opportunity for us and providing all the needy facilities for us.

I am proud to be a NSS cadet.

Brace the ocean of yourmind

With a sight so long
I embark on my journey They think I am not strong,
I might get entangled in tyranny. But life is one, it must go on.
Whatever the differences, whatever the bonds.
The beauty of my dreams and the passion in my heart It's precious.
No one can grab its hold,
till there resides wonder in my soul.
And I daresay,
There would be another dull start to another fine day.
But an opening of sorts will finally find its way.
The rays of hope, the determination in my eyes will illuminate me from within
And I will continue my life,
with the hands of a clock beside me ticking.

Now here I am at the cross-roads.
With a gleam in my eyes, to conquer the Cosmos.
I finally take my first step forward, Determined -
a sailor set out to brace the ocean of his kind

Asalute to the Brave women soldiers of the Indian Armed Forces

The Indian Army started recruiting women officers in 1992. Every six months, about 5000 women graduates and postgraduates between the ages of 21 and 25 years apply to join the Army. Barely a fifth clear the written test and only a tenth of those who do so are selected.

There have been many notable achievements as well by women in Olive Green. Here are some.

The Indian Army did Mt. Everest Expedition in 2005 and 2012 for women officers. Captain Shipra Mazumdar, Captain Ashwini Pawar, Cadet Tshering Ladol and Trainee Dechin Lhamo scaled the 8848-metre Mt Everest.

There was one expedition to highest point of Siachen Glacier, "Indira Col". A team comprising only lady officers of the Indian Army scaled Indira Col, the highest point on Siachen glacier on 15 August 2009, making it the first ladies team to have reached the highest battlefield in the world.

The first woman in the history of the Indian Army, to be selected for the 'Sword of Honour', is Chennai-girl Divya Ajith in year 2010.

She beat 244 fellow gentlemen and women cadets, to win the Best All- Round Cadet award and get the 'Sword of Honour', which is the highest award given to a cadet of the Officers Training Academy.

Women don't join Combat Operations, but one woman beat the odds and joined the Territorial Army, she was Jawan Shanti Tigga. She was honoured by former President Pratibha Patil for being the 1st female jawan of our country.

Lieutenant Ganeve Lalji, a young intelligence officer created history by becoming the first woman to be appointed a key aide to an Army Commander.

Punita Arora is the first woman in India to don the second highest rank i.e. Lieutant General of Indian Armed Forces and the first Vice admiral of Indian Navy.

Squadron leader Veena Saharan became the first woman pilot to land heavy lift transport aircraft IL-76 at Leh airfield. Another officer, squadron leader Nidhi Handa, the first woman pilot in IAF from Himachal Pradesh, in a short career span of six years, reached the B-Green category which allows her to captain an aircraft in all the roles in every sector of the country.

History was made on 26 January 2012, when Flight Lt Sneha Shekhawat, a woman Indian Air Force (IAF) officer, led a contingent of 144 airmen at the 63rd Republic Day parade down the Rajpath. In 2015, she led a all women contingent on Republic Day Parade.

Well, most of the girls are happier being Army wife. Hope when you read, you get motivated to join the esteemed forces. "You have never lived until you have almost died, and for those who choose to fight, Life has a special flavor,

The protected will never know!"

Top Software Development Trends in 2019

Software Trend 1: Artificial Intelligence

Artificial intelligence is not much complicated to understand for a layman. In fact, every person has some idea about this technology. It involves developing software that thinks intelligently in the same manner as a human.

Today companies providing machine learning services and solutions are on a boom and more-and-more businesses are shifting towards AI as a necessity. It helps to improvise the tasks and increasing the business in the software market. It has reached the fields like healthcare, education, banking as well which has widened the scope of constant experiments by web app developers.

Software Trend 2: Blockchain

Blockchain has gained its popularity with Bitcoin. But, now it is widely used in banking & finance, media & publishing, and healthcare software development services.

Blockchain technology relates to simplifying banking transactions like transferring money by creating a single ledger for different parties.

All these services need blockchain software which is why a large number of blockchain developers would be needed to serve in this sector

Software trend 3: Low Code Development

If you dare to think of web & software development as an approach similar to building lego blocks, what you'll get would be something known as low-code development.

In a world where standards, policies, regulations, and procedure keep getting updated from time to time, standard coding practices make the process of adapting slow and gruesome for companies and IT developers alike.

Low-code development is a panacea for all these problems, and in the absence of complex codes which require expertise- it can help clients understand their project in better ways, and perhaps enable them to perform customizations on their own.

Software Trend 4: Code Quality

As technology is flourishing, it is essential to focus on the quality of your codes and language trends also. The need for the year 2019 is to have a special eye on the development approach as well.

As discussed earlier, low code development is also on a rising trend in the software industry. This means that even non-technical employees can be hired to program software by information technology companies.

Software Trend 5: Language Trends

Most of the full stack developers are using Javascript to program the software. The popularity of this language is due to its great adaptivity for hybrid applications as well.

It is essentially vital to choose the correct language to avoid any kind of repercussions in the later stage. There are various surveys that let us know about the popularity of different languages.

In the stack overflow survey of commonly used libraries, frameworks & programming languages, Node.js scored 49.9% and Angular scored 39.6%. Some other popular libraries, frameworks & languages are React, .NET core, spring etc. Here is the graphical representation of their findings: This data clearly shows the most used and popular languages which are in trend this year in software developing industries. You can utilize this information to finalize your year plan in custom software development.

Software Trend 6: Progressive web applications

These applications are different from   regular mobile apps. You can understand it as a hybrid of web applications and mobile applications. They work on a script called service worker and it is their integral part.

They are faster to load and provides some amazing features like push notifications. PWAs are easy to develop and maintain that's why many mobile app development companies have focused on them in recent years.

Software Trend 7: Cyber security

Security is an issue in every parameter of human life and this issue spreads its presence in all sizes of business as well. Data and software loss threats have become a major part to look out by custom software developers.

Every industry is facing cyber security issues and they all look upon the software industry for support which makes it a trendy service requirement in the IT sector.

Software Trend 8: Outsourcing

Global outsourcing market is rising every year and has tremendous trends. A survey by Statista shows the global market size of outsourcing services. This gives a clear picture that the outsourcing market is on a rising spree worldwide. IT industry also has many outsourcing projects as business owners prefer outsourcing developers rather than hiring in-house developers.

Industries in all almost every arena in the age of digitalization have a high demand for full stack developers to look into their software needs. From elearning software development to financial software development, software requirements are rising with every passing year.

Software Trend 9: IoT

IoT app development is the latest advancement in software development which has its effects spread at both the consumer and industrial scale. The technology that essentially binds that all technologies together is set to witness an exponential demand across the domains of safety and customer experience.

As per PWC estimates, over 90% automobiles will be IoT enabled by the year 2020. Such a degree of connectivity and control is expected to deliver incremental efficiency in fields of transportation, logistics and supply chains.

Software Trend 10: The Mixed Reality

The twin technologies of augmented reality (AR) and virtual reality (VR), combine to form what we call the mixed reality. One of these twins- AR has witnessed an incredible amount of growth over the years thanks to its integration on smartphone apps. Undoubtedly, the reason why AR and hiring AR developers is so popular, and why companies are scrambling to have an AR application is primarily because of smartphones. AR apps don't generally require hardware with high specifications as compared to its twin technology: VR.

Many say that the demand for VR has saturated since its explosion in 2016 and that its scope doesn't extend beyond entertainment and gaming. However, it's effective utilization by the US Army and Walmart, among others doesn't seem to indicate so.

Amongst the crowd that seems to have lost confidence in VR app developers, some have been able to find the best uses for this technology. While Walmart plans to use VR in 2019 to train its employees in customer service and compliance, the US Army is already using Microsoft's HoloLens's mixed reality tech for military training purposes.

Some points to keep in mind

Make or buy decision

It refers to the problem was encountered in all the organization when deciding the product whether it should be purchased from outside or manufactured internally the majority of make or buy decision is made on the basis of price. Mean in his decisions are done in order to maximize the profit margins.

Make or buy decision is valid concept in business.

No organization must make their own when the standard opportunity to buy the same for low Price. It is very potential to save the business money because this may probably increase the labour cost other expenses and soon so that we need to balance the savings against the cost to see whether making items in organization for buying them from outside vendor makes the most financial sense. But making concept is useful when we are dissatisfied with the quality produced by outside Windows and then we can make it by ourselves which requires an corporate production equipments and other things etc. Both make and buy concept as their own pros and cons as main concept requires much effectiveness increases more cost but by concept reduces investment saves time and cost. However some of the organization will utilize the decision of both make and buy concept whether the company should produce a product by itself or purchase it from an outside vendor by balance in the profit margin.

IT CLASS

Students on Monday and Friday get up & rush up fast to college to attain the IT class. Forn every student in our college IT subject is something special and interesting when compared to other subject because its handled by our gifted (favorite) principal.

When principal entries into the class there should be pin drop silence in the class and students must be in their uniform if not she start up her lecture to scold and opens up big dark eyes to stare.

Before commencing the Income Tax problem she gives sweet and brief explanation not only from exam point of you but from life point of you, to test the common knowledge of students, ask the general knowledge questions where students will be like search engine to give the answer.

Principal lecture is as speed as metro train where as students will be skating to catch IT train part of IT class turn into counseling and advising class to council the students regarding changes in life career disciplines etc

Motivational speech given for students will be to achieve in life, definitely students will achieve. By this we can say that VET students are gifted by a good hearted principal. Professor whom not only teaches IT problems and solutions but also teaches hoe to overcome or solve the real life problems and hurdles

Poem on IT class

Principal comes to class like lion

Students will be like rat and cat

IT lecture is like as speed as metro train

Pen and mind of student runs to catch IT train

When principal questions cleverly

Students become search engines

Talking in IT class is taxable

Which can't be deducted under sec 80C-80U

Taxable salary and house property in 5th sem taxable business and capital gains in 6th sem

Listening 2hrs lecture is restless in IT class

Teaching calm and peacefully IT problems

2 emerging security technologies set to level the battlefield

1. Hardware authentication

The inadequacies of usernames and passwords are well known. Clearly, a more secure form of authentication is needed. One method is to bake authentication into a user's hardware. Intel is moving in that direction with the Authenticate solution in its new, sixth-generation Core vPro processor. It can combine a variety of hardware-enhanced factors at the same time to validate a user's identity.

Intel has built on previous efforts to dedicate a portion of the chipset for security functions to make a device part of the authentication process. Good authentication requires three things from users: what they know, such as a password; who they are, such as a username; and what they have, such as a token. In the case of Authenticate, the device becomes the what-you-have.

"This isn't new," said Scott Crawford, research director for information security at 451 Research. "We've seen this in other manifestations, such as licensing technologies and tokens."

Hardware authentication can be particularly important for the Internet of Things (IoT) where a network wants to ensure that the thing trying to gain access to it is something that should have access to it.

However, Crawford noted, "The most immediate application for the technology is for authenticating an endpoint in a traditional IT environment — laptops, desktops, and mobile devices using Intel chipsets."

2. User-behavior analytics

Once someone's username and password are compromised, whoever has them can waltz onto a network and engage in all kinds of malicious behavior. That behavior can trigger a red flag to system defenders if they're employing user behavior analytics (UBA). The technology uses big data analytics to identify anomalous behavior by a user.

He explained that the technology addresses a blind spot in enterprise security. "Once an attacker gains entry into an enterprise, what happens then?" he asked. "One of the first things they do is compromise credentials. So then the question becomes, Can you differentiate between a legitimate user's activity and an attacker who has gained entry, compromised a legitimate user's credentials and is now looking for other targets?"

Visibility into activity that does not fit the norm of the legitimate user can close a blind spot in the middle of the attack chain. "If you think of the attack chain as initial penetration, lateral movement, and then compromise, theft, and exfiltration of sensitive data, the middle links in that attack chain have not been very visible to enterprise security pros, and that's why the interest in user behavior analytics today," Crawford said.

Comparing a user's present behavior to past behavior isn't the only way UBA can identify a malicious actor. "There's something called 'peer analysis'," explained Steven Grossman, vice president for program management at Bay Dynamics, a threat analytics company. "It compares how someone is behaving compared to people with the same manager or same department. That can be an indicator that the person is doing something they shouldn't be doing or someone else has taken over their account."

ಮತ್ತು ಬೇಕೆನಿಸಿದೆ ಹಾಸಿಗೆಯ ಆಸರೆ
ಒಲ್ಲದ ಮನಸಲಿ ಕಣ್ಣು ಬಿಟ್ಟರೆ
ಕಾದಿರುತ್ತೆ ರಾಶಿ ಕೆಲಸದಾ ಹೊರೆ

ಗಂಡು ಸರಿಸಮ. ಯಾರೂ ಹೆಚ್ಚು ಅಲ್ಲ ? ಯಾರು ಕಡಿಮೆಯು ಅಲ್ಲ ? ಸರಿ, ನಾನು ಆ ಶಾಸ್ತ್ರ ಮಾಡ್ತೀನಿ ಆದರೆ ಒಂದು ಷರತ್ತು. ನೀನು ನನ್ನ ಕಾಲು ತೊಳೆದು ಆ ನೀರನ್ನು ತಲೆ ಮೇಲೆ ಹಾಕ್ಕೋತೀಯಾ ? ವಂದು ಧ್ವನಿ ಎತ್ತಿ ಕೇಳ್ತಾಳೆ. ಸಿಂಹಿಣಿ ಮಾತು ಕೇಳಿದ ಎಲ್ಲಾ ದೊಡ್ಡವರು ಅವಳಿಗೆ ಬೈತಾರೆ. ಆದರೆ ಅವಳು ಗಂಡುಬೀರಿ ಆಗಲಿ, ಅಹಂಕಾರಿ ಆಗಲಿ ಅಲ್ಲ, ಧೈರ್ಯ ಇರುವಂತಹ ಹೆಣ್ಣು ಮಗಳು. ಅವಳ ಧೈರ್ಯ ನೋಡಿದ ಕೆಲವು ಜನರು ಅವಳನ್ನು ನೋಡಿ ಹೆಮ್ಮೆ ಪಟ್ಟರು ಇನ್ನೂ ಕೆಲವರು ನನಗೆ ಹುಟ್ಟಿದರೆ ಇಂತಹ ಮಗಳೇ ಹುಟ್ಟಬೇಕು" ಎಂದು ಹೇಳ್ತಾರೆ.

(ಎಲ್ಲಾ ತಂದೆ–ತಾಯಿಯರು ಏನನ್ನು ತಿಳಿಯಬೇಕೆಂದರೆ ಹೆಣ್ಣು ಮಕ್ಕಳು ಹುಟ್ಟಿದ ತಕ್ಷಣವೇ ಧೈರ್ಯವಂತರಾಗಿ ಇರುವುದಿಲ್ಲ. ಆದರೆ ಅವಳನ್ನು ಓದಿಸಿದರೆ, ಆ ಮಗಳೇ ಮುಂದೊಂದು ದಿನ ನಿಮ್ಮನ್ನೆಲ್ಲ ಸಾಕುತ್ತಾಳೆ. ಹೆಣ್ಣು ಮಕ್ಕಳು ಮುಸುರೆ ತಿಕ್ಕಲು ಮಾತ್ರ ಸೀಮಿತವಲ್ಲ. ಈ ಜಗತ್ತನ್ನೇ ಆಳುವ ಸಾಮರ್ಥ್ಯವಿರುವವರು).

ಲಕ್ಷ್ಮೀಗೆ ಅವತ್ತು ಸಂಗೀತ ಶಾಲೆಗೆ ಸೇರಿಸಿ ಅವಳನ್ನು ಎಸ್.ಎಸ್.ಎಲ್.ಸಿ. ನಂತರ ಓದಿಸಿದರೆ ಅವಳು ಇವತ್ತು ಸಾಯುತ್ತಿರಲಿಲ್ಲ. ಅವಳಿಗೆ ಹೊರಗಿನ ಪ್ರಪಂಚವನ್ನೇ ನೋಡಲು ಬಿಡಲಿಲ್ಲ.

"ಮಕ್ಕಳಿಗಾಗಿ ಆಸ್ತಿ ಮಾಡದೆ, ಮಕ್ಕಳನ್ನೇ ಆಸ್ತಿಯಾಗಿ ಮಾಡಿ"

ತಂದೆ–ತಾಯಿಯರು ಮಕ್ಕಳಿಗಾಗಿ ಆಸ್ತಿ ಮಾಡಿದರೆ ಮುಂದೊಂದು ದಿನ ಹೆಣ್ಣು ಮಕ್ಕಳಿಗೆ ಲಕ್ಷ್ಮೀಯ ಪರಿಸ್ಥಿತಿ ಬರಬಹುದು. ಗಂಡು ಮಕ್ಕಳು ಧೂಮಪಾನ ಮತ್ತು ಸಾರಾಯಿ ಕುಡಿತದ ಚಟಕ್ಕೆ ಬೀಳ್ತಾರೆ ಮತ್ತು ಸೋಂಬೇರಿಯಾಗ್ತಾರೆ. ಮಕ್ಕಳು ಹಾಳಾಗಲು (ತಂದೆ–ತಾಯಿ) ನೀವೆ ದಾರಿ ಮಾಡಿಕೊಡ್ತೀರಾ.

ಅದೇ ಮಕ್ಕಳನ್ನು ಆಸ್ತಿಯಾಗಿ ಮಾಡಿದರೆ ಇಡಿ ಪ್ರಪಂಚವನ್ನೇ ಗೆಲ್ಲಬಹುದು. ಅವರ ಜೀವನ ಸುಂದರವಾಗಿರುತ್ತೆ. (ಹೆಣ್ಣು ಮಕ್ಕಳಿಗೆ ಸ್ವಾತಂತ್ರ್ಯ ಕೊಡಿ. ವರದಕ್ಷಣೆ ಮತ್ತು ಬಾಲ್ಯವಿವಾಹ ನಿಷೇದಿಸಿ. ಹೆಣ್ಣನ್ನು ಕೀಳಾಗಿ ನೋಡಬೇಡಿ. ಅವಳು ಅಮ್ಮ, ಸಂಗಾತಿ, ಸಹೋದರಿ ಮತ್ತು ಗೆಳತಿ)

ಸೋಮಾರಿತನವೆಂಬ ಶತ್ರು

ವೀರ ಸನ್ಯಾಸಿ ವಿವೇಕಾನಂದರು 'ನಮ್ಮ ಏಳಿಗೆಗೆ ನಾವೇ ಶಿಲ್ಪಿ' ಎಂದು ಹೇಳಿದ್ದಾರೆ. ಈ ಮಾತು ಅಪ್ಪಟ ಸತ್ಯ. ಪ್ರತಿಯೊಬ್ಬರೂ ವಿಶೇಷವಾದ ಶಕ್ತಿಯೊಂದು ಸುಪ್ತಾವಸ್ಥೆಯಲ್ಲಿರುತ್ತದೆ. ಅದನ್ನು ಬಡಿದೆಬ್ಬಿಸಿ ಪ್ರೇರೇಪಿಸಿ, ಕಾರ್ಯೋನ್ಮುಖಿಗೊಳಿಸಿದಾಗ ಮಾತ್ರ ಅಂದುಕೊಂಡದ್ದನ್ನು ಸಾಧಿಸಲು ಸಾಧ್ಯ. ಹಾಗಂತ ಇದು ಎಲ್ಲರಿಗೂ ಗೊತ್ತಿರುವ ವಿಷಯವೇ ಆದರೂ ಪ್ರತಿಯೊಂದಕ್ಕೂ ಆಲಸ್ಯ ಮಾಡುತ್ತೇವೆ.

ಸಾಧಿಸಬೇಕೆಂಬ ಆಸೆ ಪ್ರತಿಯೊಬ್ಬರಲ್ಲೂ ಇರುತ್ತದೆ. ಆದರೆ ಆ ಮಾರ್ಗದಲ್ಲಿ ನಮ್ಮನ್ನು ಅಡ್ಡಗಟ್ಟಿ ನಮ್ಮ ಕೆಲಸವನ್ನು ಹಾಳು ಮಾಡಿ, ನಮ್ಮನ್ನು ಪಥ ಭ್ರಷ್ಟರನ್ನಾಗಿ ಮಾಡುವ ಶತ್ರುವೊಬ್ಬನಿದ್ದಾನೆ ಅವನೆಲ್ಲಿದ್ದಾನೆ ? ಅವನ್ಯಾರು ಎಂಬ ಪ್ರಶ್ನೆಗಳು ನಿಮ್ಮ ಮನದಲ್ಲೀಗ ಮೂಡಿರಬಹುದು. ಅಲ್ಲವೇ ? ಅವನು ಬೇರೆ ಯಾರು ಅಲ್ಲ. ನಮ್ಮ ಜೊತೆಗೆ ಸಾಗುತ್ತಿರುವ ಸೋಮಾರಿತನ, ಮೈಗಳ್ಳತನವೇ ಆಗಿದೆ.

ಮೇಲ್ನೋಟಕ್ಕೆ ಸೋಮಾರಿತನ ನಮಗಿದೆ ಎನ್ನುವುದನ್ನು ಒಪ್ಪಿಕೊಳ್ಳಲು ಕಷ್ಟವಾಗಬಹುದು. ಆದರೆ ಇದು ಸತ್ಯ. ನಾವೇನೆ ಕೆಲಸ ಮಾಡಬೇಕೆಂದು ನಿಶ್ಚಯಿಸಿದರೂ ಅದಕ್ಕೆ ಮೊದಲು ತೊಂದರೆಯೊಡ್ಡುವುದು ಸೋಮಾರಿತನವಾಗಿದೆ. ಈಗೇನು ಅವಸರ ಆಮೇಲೆ ಮಾಡಿದರಾಯ್ತು. ಇನ್ನು ಯಾರೂ ಮಾಡೇ ಇಲ್ಲಾ. ಹೇಗಿದ್ದರೂ ಸಾಕಷ್ಟು ಸಮಯವಿದೆ ಎಂದೆಲ್ಲಾ ನಮ್ಮ ಮುಂದಿಟ್ಟ ಹೆಜ್ಜೆಯನ್ನು ಹಿಂದಿಡುವಂತೆ ಮಾಡುವುದು ನಮ್ಮ ಮೈಗಳ್ಳತನವೇ ಅಲ್ಲವೇ ? ಓದಬೇಕೆಂದಾಗ ಬರೆಯಬೇಕೆಂದಾಗ, ಆಡಬೇಕೆಂದಾಗ ಏನೋ ಒಂದು ಸಾಧಿಸಬೇಕೆಂದಾಗ ಮಾಡಿದ ತಪ್ಪನ್ನು ತಿದ್ದಿಕೊಳ್ಳಬೇಕೆಂಬ ಕ್ಷಣದಲ್ಲಿ ಆತ ಹಾಜರ್. ನಮ್ಮ ಮನಸ್ಸಿಗೆ ಹಿತವಾಗುವಂತೆ ನುಡಿದು ನಮ್ಮ ಬಾಯಿಂದ ಹೌದೆನ್ನಿಸಿ ಆ ಕೆಲಸದಲ್ಲಿ ಸೋತಾಗ ನಿನ್ನ ಹಣೆಬರಹವೇ ಇಷ್ಟು ಎಂದು ನಿಧಾನವಾಗಿ ಪರಾರಿಯಾಗುತ್ತಾನೆ. ನಮ್ಮೊಳಗಿನ ಸೋಮಾರಿತನವೆಂಬ ಶತ್ರು.

ಹಾಗಾದರೆ ನಾವು ಮೈಗಳ್ಳತನದಿಂದ ಪಾರಾಗಿ ಅಂದುಕೊಂಡದ್ದನ್ನು ಸಾಧಿಸುವುದಾದರೂ ಹೇಗೆ ಎಂಬ ಪ್ರಶ್ನೆ ಈಗ ನಿಮ್ಮನ್ನು ಕಾಡುತ್ತಿರಬಹುದು. ಅದಕ್ಕೆ ಉತ್ತರವು ನಿಮ್ಮ ಬಳಿಯಲ್ಲೇ ಇದೆ. ಮೊಟ್ಟ ಮೊದಲನೆಯದಾಗಿ ನಾವು ಮಾಡಬೇಕಿರುವುದು ಸೋಮಾರಿತನವನ್ನು ಬಿಡುವುದು. ಬೇಗ ಮಲಗಿ, ಬೇಗ ಏಳುವುದು, ನಮ್ಮ ಮನಕ್ಕೆ ಮತ್ತು ಶರೀರವನ್ನು ಕ್ರಿಯಾಶೀಲವಾಗಿಟ್ಟುಕೊಳ್ಳುವುದು. ಆದಷ್ಟು ಸೃಜನಶೀಲ ಚಟುವಟಿಕೆಗಳಲ್ಲಿ ತೊಡಗಿಕೊಳ್ಳುವುದು ಸೋಮಾರಿಯ ಮೆದುಲು ದೆವ್ವದ ಕಾರ್ಖಾನೆ ಎಂಬ ಮಾತೊಂದಿದೆ. ಅದನ್ನು ನೆನಪಿಟ್ಟುಕೊಂಡು "ನಮ್ಮ ಏಳ್ಗೆಗೆ ನಾವೇ ಶಿಲ್ಪಿ" ಆಗೋಣ.
